- Warehouse worker
 - Managing and handling packages in the warehouse system
 - Taking records in the IT systems
- 06/2020 - 02/2021
- Pharmacare nova oy**
- Manufacturing worker
 - Enhanced the skills on working fast and carefully

COVER LETTER

Dear HR Team,

I am writing to express my interest in the full-time Junior Software Engineer position starting in December 2024. As a motivated IT student studying Full Stack Software Development at Haaga-Helia Helsinki, I am eager to apply my skills and contribute to innovative software projects within your organization.

Throughout my studies, I have gained hands-on experience with technologies such as Java, Spring Boot, React.js, TypeScript and Python, building full-stack applications that integrate both frontend and backend development. I have also worked on team-based software projects, utilizing Agile methodologies (Scrum, Kanban), version control (Git, GitHub), and testing frameworks like Jest and JUnit to deliver high-quality results efficiently.

This opportunity excites me as it allows me to apply my skills in a real-world environment while continuing to grow and learn. My strong problem-solving abilities, combined with my experience working in teams, give me confidence in my ability to contribute to your organization.

Thank you for considering my application. I would welcome the opportunity to discuss how my technical skills and passion for development align with your team's needs. I look forward to exploring how I can make a meaningful impact within your organization.

Best regards,
Anton Rezin
